Question 1

0 / 0 pts

Why are smartphones and tablets called “thin clients”?

- ☐ They are physically thinner than computers.
- ☐ They are more mobile than computers.
- ☒ They have less software than computers.
- ☐ They have less hardware than computers.

Correct!

Correct! Thin clients have less software than computers.

Question 2

0 / 0 pts

What does “location transparency” refer to in cloud computing?

- ☐ Customers know the exact location of cloud servers.
- ☐ Customers can control the location of cloud servers.
- ☐ Customers can control how their content is distributed on cloud servers.
- ☒ Customers do not know the exact location of cloud servers.

Correct!

Correct! This is the definition of location transparency.

Question 3

0 / 0 pts

Which of the following cannot be considered a resource in cloud computing?

- ☒ Query

Correct! Query itself is not a resource in cloud computing because it cannot be purchased.

Correct!

- ☐ Storage
- ☐ Processing
- ☐ Network bandwidth

Question 4

0 / 0 pts

What does “elasticity” refer to in cloud computing?

- ☐ The number of users can be elastically increased and decreased.

Correct!

- ☒ Capabilities can be elastically provisioned and released.

Correct! This is the definition of elasticity in cloud computing.

- ☐ Prices can be elastically increased and decreased.

- ☐ Quality of service levels can be elastically changed.
